ÖZYEĞİN UNIVERSITY	Course Syllabus **EE 202 Circuit Analysis** SPRING 2025-26

INSTRUCTOR	
Name	Taylan Akdoğan
E-mail	taylan.akdogan@ozyegin.edu.tr
Phone Number	0216-564 99 59
Office Number	AB1.309
Office Hours	Mondays 13:40-14:30 or by appointment.
Research/Teaching Assistants (Labs)	*Emre İpek, emre.ipek@ozu.edu.tr* *Can Özhan, can.ozhan@ozu.edu.tr*

COURSE ORGANIZATION	
Interaction Methods	*LMS and WhatsApp Group. You can join the WhatsApp Group via https://chat.whatsapp.com/COaWKHEtGxl0rBwYOhzF8e?mode=gi_t*
Technology Used by the Instructor	*MATLAB is recommended but not required. Spice Simulators are recommended, like https://www.circuitlab.com/*
Technology Requirements for Students	-

COURSE MATERIALS	
Required Books	*"Fundamentals of Electric Circuits" by Alexander and Sadiku.*
Recommended Books	*Electric Circuits by Nilsson and Riedel* *The Analysis and Design of Linear Circuits, by Thomas, Rosa, and Toussaint* *Basic Engineering Circuit Analysis by Irwin* *Introduction to Electric Circuits by Svoboda*
Other Materials	-
Accessing Course Materials	*Any other lecture related materials will be uploaded to LMS*

WEEKLY SUBJECTS (TENTATIVE)		
Week	**Date**	**Subject**
1	9-13.02.2026	Introduction: Charge, current, power, circuit elements
2	16-20.02.2026	Basic Laws: Node, branch, loop, circuit, Kirchhoff laws
3	23-27.02.2026	Method of Analysis: Node voltage, mesh current – Part 1
4	02-06.03.2026	Method of Analysis: Node voltage, mesh current – Part 2
5	09-13.03.2026	Circuit Theorems: Superposition, Thevenin/Norton, max power transfer

6	16-20.03.2026	Operational Amplifiers
7	23-27.03.2026	Capacitors and Inductors
8	30.03-03.04.2026	First Order Circuits: RC and RL
9	06-10.04.2026	Second Order Circuits: RLC – Part 1
10	13-17.04.2026	Second Order Circuits: RLC – Part 2 *(Withdrawal Week)*
11	20-24.04.2026	AC Circuits: Phasors, steady state analysis – Part 1
12	27.04-01.05.2026	AC Circuits: Phasors, steady state analysis – Part 2
13	04-08.05.2026	Laplace Transform and its properties
14	11-15.05.2026	Applications of Laplace Transform
15	18-22.05.2026	*Make-up lecture week for any missed lecture.*

ASSESSMENT METHODS, WEIGHTS AND RULES			
Type	**Weight**	**Implementation Rule**	**Makeup Rule**
Midterm Exam	*36*	*In class.*	*Only valid excuses with an official document are accepted to qualify for a midterm makeup. See Article 28-a of the bylaw (yönetmelik) for further information.*
Homework	*0*	*A set of problems will be suggested after every major subject and posted on LMS. It is not mandatory, and it will not be graded. However, it is highly recommended that you work on them which is an integral part of the learning process.*	*N/A*
Laboratory	*24*	*6 lab sessions. Each lab session starts with a quiz related to the current lab. If the student misses a quiz, he/she can perform the lab, but such quiz grade will be zero, and there will be no makeup for the quizzes. Each quiz is worth 1 point.* *Lab reports are due by exactly 1 week after the experiment. Submit your report by the end of the lab session on the due date. Each report can grant you 3 points.* *Total lab weight = 6x(1 + 3) = 24 pts*	*Only valid excuses with an official document are accepted to qualify to be excused. See Article 28-a of the bylaw (yönetmelik) for further information.* *No makeup will be provided regardless of the cases listed below:* *1) If you miss one lab session with a valid excuse, the lab grade will be normalized to exclude the missing lab session.* *2) If you miss one lab session without a valid excuse, the lab grade will be assumed to be zero.* *3) If you miss two lab sessions, at least one with a valid excuse, the lab grade will be normalized to exclude one of the missing lab session, the other lab grade will be assumed to be zero.* *4) If you miss two lab sessions without valid excuses, it leads to a direct F.* *5) If you miss three or more lab sessions, it leads to a direct F regardless of the validity of the excuses.*
Final Exam	*40*	*In class.*	BÜT exam will serve as the makeup for the final exam.
Total	**100%**		

METHODS FOR TRACKING ATTENDANCE & IMPACT OF ATTENDANCE ON SUCCESS			
Method	**Application Details**	**Required Tools and Make-up Method**	**Impact of Attendance of Course Grade**
Signature Sheet	An attendance sheet will be circulated during class. Signing the sheet will be accepted as proof of attendance.	No technological tools are required. A pen is sufficient to sign the sheet.	Out of 20 lecture sessions chosen randomly, at least 10 must be attended. Students who fail to meet this requirement will automatically fail the course due to absence. Attendance requirement for the labs are defined above.

ASSESSMENT(S) BEFORE THE WITHDRAWAL DEADLINE		
Type of Assessment(s)	**Weight(s)**	**Date by When the Score of the Assessment is to be Announced**
Midterm grade	30%	*April 15th or earlier*

DETERMINING LETTER GRADE
The distribution of cumulative grades will be fitted to a gaussian curve. Grades of students who did not take the midterm or final exam or did take but received 5% will be excluded from this distribution before the fit. *The instructor will choose the lower limit of letter grade C such that it is in between mean +- 1 sigma of the fit if the number of students in the distribution is greater than or equal to 50, otherwise it will be in between mean +- 1.5 sigma.* *The rest of the letter grades will be adjusted with equal spacing on the grade axis of the distribution. The final distribution will be shared on LMS without the student names after the letter grades are submitted.* *Direct F conditions are defined in assessment section for the laboratory makeup rules and attendance section for the lectures. Those students who cannot satisfy those attendance requitements of the labs or lectures will be given direct F regardless of the Midterm/Final grades and cannot take the final and BÜT exam.*

EXPECTED STUDENT SEMESTER WORKLOAD	
Activities Carried Out in The Presence of An Instructor	**Total Hours in Semester**
Lecture (Including Discussion Sessions)	56
Laboratory	42
Activities Carried Out by The Learner Him/Herself	**Total Hours in Semester**
Self study	18
Laboratory preparation	2
Lab report	26
Homework	20
Overall Total Hours in Semester	***164***

RULES FOR THE USE OF AI IN THE COURSE	
Use of AI in the Course **(Limited Use)**	Provided that you comply with the **Principles for the Responsible Use of AI** listed below, you may use AI tools (ChatGPT, Copilot, Gemini, Claude, Grok, DeepSeek, etc.) in this course only for **supportive purposes** and within the **restrictions** stated here. You must clearly acknowledge AI contributions, act ethically and transparently, and comply with university policies. *Permitted uses: Only idea generation, concept explanation, writing and language support, preliminary research and drafting for your lab reports. You must clearly acknowledge the use in the report.* *Prohibited uses: Producing the main content of the lab reports (e.g., analysis, solutions, commentary, coding, etc.) with AI tools.*
Principles for the Responsible Use of AI	1. **Use AI as a tool to support your learning, not as the ultimate source of knowledge:** AI can assist your learning and work, but the final judgment, creativity, and ownership of the output must always remain with you. 2. **Be transparent about AI's contribution:** If you use AI to generate, summarize, or improve any part of your work, you must clearly acknowledge it. Transparency protects your academic honesty and strengthens professional integrity. 3. **Recognize the limitations and biases of AI:** AI may produce inaccurate, incomplete, or biased outputs. Always review the results critically and verify them before using. 4. **Consult diverse sources, not just AI:** Do not rely solely on AI for information. Support, compare, and cross-check AI outputs with other valid and reliable sources. 5. **Protect your data and privacy:** Never share personal, sensitive, or confidential information with AI tools. Safeguarding such information is your responsibility.

OTHER RULES AND INFORMATION	
Health	The mode of instruction is subject to change in case of pandemic or other similar unavoidable reasons in line with the directives of the authorized public bodies. In such a case, the necessary revisions will be binding for all members of the OzU community, and will be announced by the relevant units, in particular Student Services.
Safety	Announced safety procedures must be strictly followed during any laboratory and similar work. Please refer to the safety guidelines posted in the laboratories. In case of emergencies, call 9911 (216 564 9911).
Accessibility	Reasonable accommodations will be provided for students with verifiable disabilities. Please inform your instructor if you need any assistance.
Academic and Technical Support	Students can get help from the Writing Center, Solution Center and IT in case they need academic and/or technical support with their classes.
Objections to Examination Results	Students who object to their exam results and cannot resolve their objections with the instructor of the course, may file a written petition for a review of their exam papers at their Dean's/Director's Office within five business days from the announcement their exam results.

Academic Integrity and Honor Code	Students are assumed to abide by scholastic honesty and uphold the Honor Code. Scholastic dishonesty includes, but is not limited to cheating, attempting to cheat, plagiarizing, fabricating information or citations, facilitating acts of dishonesty by others, having unauthorized possession of examinations, submitting the work of another person, or tampering with the academic work of other students. Any form of scholastic dishonesty is a serious academic violation and will result in a disciplinary action and also may result in student getting a 0 grade in the related assessment.
Unauthorized Recording/Sharing of Lectures	Recording/sharing of synchronous/asynchronous lectures or copying of lecture recordings are prohibited without the permission of the instructor. Actions such as unauthorized recording, giving the recording to someone else, taking it, using it or sharing it in physical or virtual media are prohibited and/or are offenses according to the relevant legislation. In such cases, legal procedures will be initiated in addition to starting disciplinary actions against those involved.
Flexibility	Circumstances may arise during the course that prevents the instructor from fulfilling each and every component of this syllabus; therefore, the syllabus is subject to change. Students will be notified prior to any changes.
Principles for Classroom Behavior	Creating a safe space where ideas can be freely discussed in our classroom is everyone's responsibility. In accordance with the relevant disciplinary regulations, any verbal or written expression that disrupts the order of the class, involves the unauthorized distribution of materials, or is discriminatory or violent, and that violates the dignity of individuals in the classroom (students or educators) is strictly prohibited. During class, all participants are expected to respect each other's rights.
